Redbud by Kennedy Zittel

FROM THE DIRECTOR

Across the area, we experienced, on Sunday, May 17th, an intense wind and rainstorm. It wreaked havoc with our daily lives. These storms, once subsided, brought us all out to see what nature had rearranged and make sure that our family, friends, and neighbors were okay. As we checked our trails, we noticed many birds seemed to be doing the same thing. We heard the clamoring of warblers the day after the storm as they migrated back north. It was the same for humans. We saw many folks walking around the neighborhood all at the same time, huddling up to talk about the rearrangement nature handed out. Well, why not come out, as many of us had no power; it was delightful in many respects to see community in action. Thank you to everyone and anyone that helped someone or many.

At the Dunes, many hundreds of trees are now horizontal and roots with soil are vertical. We understandably lament the large and likely older trees down and no longer creating shade, or pumping water from the soil, or taking in CO2, or just poking above the rest of the forest with their majestical crowns. Yet… this is the way of the woods; these large root tip-ups eventually turn into mounds with a depression on one side. The new depressions make a great microsite for frogs and salamanders. The downed log is a wonderful place to take refuge for many different species, from new trees to germinate on, for fungi to flourish, and for a raccoon to hang-out in. New light to the forest floor may let that struggling seedling really take hold, so it too can reach great heights with the new solar power pouring on its leaves. Yes, it is tough to see destruction, but onward it is and new gifts are created.

We have been busy working with many volunteers. Our Cattail Trail boardwalk is now complete with a railing. We are deeply grateful to the many volunteers who helped finish this project. Later this summer, we will add informational signs along the boardwalk, so please visit often as the summer landscape comes into full greenery.

We refreshed our Little Wings Play Area with a new fence, including fun winged critter toppers on several posts. We also removed the aging platform around the mulberry and green ash trees, and took down the green ash after it succumbed to the emerald ash borer. The play shed now has a new step and new flooring, creating a welcoming hideaway for children. We also added a fresh load of sand to the swale. Thank you to the Two Rivers High School students who spent an afternoon hauling six yards of sand over the ridge and into the swale. Funding for these improvements came from multiple sources, including the REI Cooperative Action Fund and donations from Girl Scouts honoring the memory

(Continued on page 2)

L to R: Dan Hornung, Mary Sweetman, Anne Schuette, Jim Sweetman, Sherry Hirssig

(Continued from page 1)

of their leader, Mona Moen. The crew pictured here spent two Fridays installing the fence. Thank you to Girl Scout Troop 215 and their partners for their perseverance in completing the project in time for Bird Breakfast. Many other volunteers also assisted with this upgrade including the deer hunter volunteers. Watch for more fun activities coming soon to the Little Wings Play Area.

Meanwhile, out at our Bugler Preserve, we are fortunate to be able to have the bathroom in the old farmhouse get a big facelift. The new improved tub, shower, toilet and sink will help our summer interns refresh after a day out on the preserve, either planting trees and shrubs, mitigating for dreaded invasive plants or wrangling and teaching the youngsters experiencing nature. We are grateful to our facilities board member Nick Lohr for his expertise in helping us decide on the suitable amount of rehab for this old house. We have four great interns staying with us this summer.

Other behind-the-scenes work is happening with our board and our committees. We are spending some time gathering up and assessing our strengths, needs, weaknesses and setting a path for the coming years. The result of this important planning will be implemented over the summer, and it will help guide us as we continue to grow and adapt. Once we have it more polished, we will gladly share what we have found and our major goals. Please know we always welcome your input. Just reach out to me via email or phone or send a letter.

Mark McLauglin with proper PPE!

Speaking of board members, we have been working a lot with our Board President Mark McLaughlin lately. He has helped with some trail clearing, troubleshooted a water heater gone rogue and taken care of some general maintenance items. We certainly would love to have him as our maintenance technician!! Anyway, the point is that our board members step up and wear many hats, just like our staff and we thank them for that!

So many people like you make this place called Woodland Dunes a wonderful community asset. We appreciate each one of you and all the ways you continue to support our mission of habitat preservation and nature education with access for people now and into the future. Have a wonderful summer—and save the date for our member appreciation meeting on Friday, August 7th from 5:00 to 7:00pm. Look for your invitation to arrive in your mailbox in July.

Habitat Management

Trout lily by Max Kornetzke

In May, I and nine volunteers planted 600 bareroot trees in the preserve. These were planted south of our Willow Trail in a section where large honeysuckles had been removed, as well as replacements for trees that were lost in previous planting areas.

At our Bugler preserve, volunteers helped to plant a variety of spring wildflowers to offer flowering resources to the endangered rusty patched bumble bee and other native pollinators. Species planted include yellow troutlily *(Erythronium americanum)*, bluebead lily *(Clintonia borealis)*, bunchberry *(Cornus canadensis)*, bloodroot *(Sanguinaria canadensis)*, mayapple *(Podophyllum peltatum)*, wild ginger *(Asarum canadense)*, wild geranium *(Geranium maculatum)*, smooth yellow violet *(Viola pubescens var. scabriuscula)*, spikenard *(Aralia racemosa)*, wild columbine *(Aquilegia canadensis)*, false soloman's seal *(Maianthemum racemosum)* and starry false Soloman's seal *(Maianthemum stellatum)*.

In June Woodland Dunes Habitat Restoration Interns will be helping plant a range of native understory shrubs for pollinators at our Bugler Preserve. Species included are Allegheny serviceberry *(Amelanchier laevis)*, alternate leaf dogwood *(Cornus alternifolia)*, common snowberry *(Symphoricarpos albus)*, dwarf bush honeysuckle *(Diervilla lonicera)*, downy arrowwood viburnum *(Viburnum rafinesquianum)* and the special concern species, Canadian yew *(Taxus canadensis)*.

Canadian yew is a small growing evergreen shrub that was once a much more abundant species among northern forests. It is naturally occurring along the ridges and swales of Woodland Dunes and Point Beach. Unfortunately it has greatly declined across its native range, largely due to an overabundance of deer.

L to R: Anthony Munz and Jenene Garey, volunteers planting spring emphemerals.

Where I've found Canadian yew to be most successful is where it is inaccessible to deer, namely surrounded by other shrubs or large woody obstacles. Our new specimens will have temporary reprieve from browsing due to the large nine-acre deer exclosure we established in 2025. Informed by our wild population's strategy, we will also plant them in spots that offer natural protection for future success post-exclosure.

I do regular visits to our Bugler deer exclosure to make sure our perimeter is not breached by downed branches or trees. As the forest began to awaken this spring, I could already see the impacts of preventing access to deer. A shrub found in other spots on the property, red elderberry *(Sambucus racemosa)* is popping up across the protected woodland area. Upon a closer look, some of these are sprouting from small woody nubs that have been continuously mowed back, while others are fresh seedlings emerging from the soil's natural seed bank. The regeneration of a fast growing shrub like this brings some early satisfaction as we anticipate the long-term outcomes of this project.

I've experienced this with our smaller exclosure on Conifer Trail as well. Here there are natural populations of our other native black elderberry *(Sambucus canadensis)* as well as heavily browsed winterberry *(Ilex verticillata)*. After just a few months after installation in 2024, both species had begun to bounce back. These shrubs offer important cover and resources to native birds, but they are also useful cover for competing with invasive species like common buckthorn.

– Max Kornetzke, Land Manager

NATURE CORNER

Barred Owl

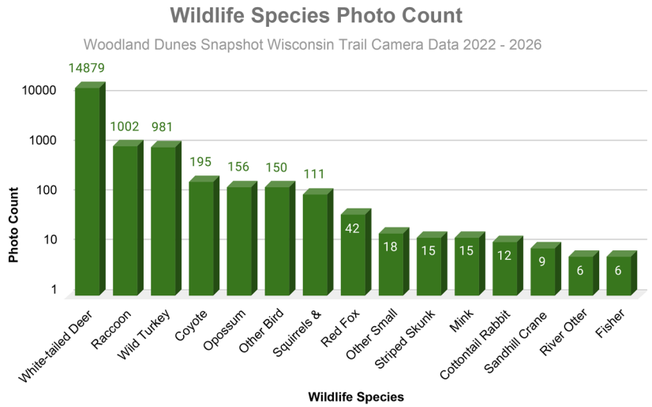
Sandhill Crane

Red-shouldered Hawk

Woodland Dunes has been a Snapshot Wisconsin Trail Camera host since February of 2022. Snapshot Wisconsin is a citizen science collaboration run by the Wisconsin DNR where volunteers monitor wildlife trail cameras across Wisconsin to get a better understanding of wildlife populations and animal behavior. The photos collected from the cameras are classified online by volunteers across the globe and the data is used by the DNR to make informed wildlife management decisions.

Our Snapshot Wisconsin trail camera is located within our State Natural Area, in a forested wetland habitat facing a wildlife trail. Over the last three years we have gotten images of cottontail rabbits, coyotes, white-tailed deer, fisher, red fox, mink, opossum, river otters, striped skunks, raccoons, grey squirrels, red squirrels, small mammals like mice, and a variety of bird species. Birds within the Snapshot Wisconsin program are broken into categories of sandhill cranes, wild turkeys, and "other birds". Our "other bird" species include barred owls, American crows, northern flickers, black-capped chickadees, mallards, and even the state threatened red-shouldered hawk.

This may come as no surprise, but the animal we have captured the most images of has been the white-tailed deer with a grand total (as of now) of almost 15,000 images! The second highest capture rate is raccoons followed by wild turkeys in third.



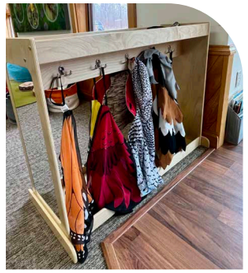
One of the best sightings to date was capturing images of the state-threatened red-shouldered hawk in 2023. Not only is the species uncommon, getting any raptor on a trail camera is uncommon. The raptor has to be flying low to the ground or be walking on the ground to be captured by the trail camera attached to the base of a tree. Based on the image series it looks like the red-shouldered hawk had swooped down to capture prey before taking off again, landing in front of the camera by luck!

It is fun to watch the personalities of some of the animals shine through in the images, raccoons washing their food in the wet swales, black-capped chickadees pecking at the camera, and curious white-tailed deer staring at the camera trying to figure out what it is.

Woodland Dunes uses the information gathered from this camera collaboration in our educational programing and wildlife species data collection. Trail camera data also adds to our understanding of what species are using which habitats on our preserve, leading to better habitat management decisions as well. (Photos are from the trail camera.)

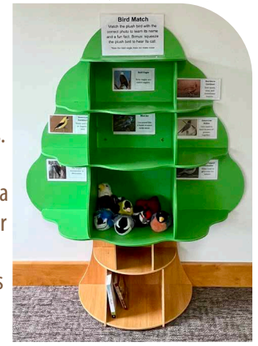
By Kennedy Zittel, Naturalist

THIS & THAT



Education Room Upgrades

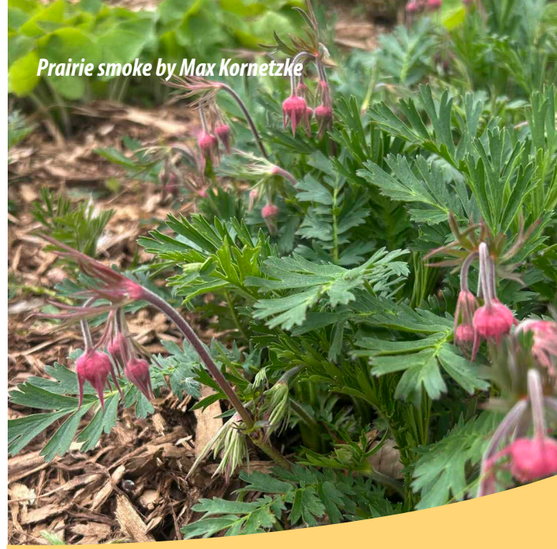
The education room looks a little different thanks to a Cellcom Green Gift. We reorganized the space, purchased a tree shelf and added a bird match game for visitors to enjoy. A new simple microscope is now part of the science table as well as some new activity bins. We also set up a baby/toddler area with a blanket for tummy time. An owl busy board is mounted low on the wall for our youngest friends to play with and we moved the glider next to it. Finally, we purchased a costume organizer with a child-sized mirror so kids can see how they look dressed as an owl, butterfly, or songbird. These new additions have already been well-loved by many visitors!



Exciting News in the Sky Shed

We are happy to announce that the telescope in the Sky Shed is now using Electronically Assisted Astronomy (EAA) during our monthly star parties. This means a special camera is used to view celestial objects that are shown on a large screen mounted on the wall. The camera is connected to the telescope and downloads short-exposure images using "live stacking" software. This provides a higher-quality photo in a matter of minutes without needing to climb the ladder to look into the eyepiece of the telescope. Please join us for a summer star party to see this wonderful addition in person. Thank you to Lee and Eileen Kummer for their generous donation to make this possible.

A glimpse of the Sombrero Galaxy (M104), located about 28 million light-years away from our galaxy!



Prairie smoke by Max Kornetzke

The Butterfly & Bee Garden

Dorothy R. Star Butterfly Garden has been in the process of a bit of a makeover. Our aging pond has been updated with a new pump to keep the water moving for our frog and bird friends. In some areas you will see lots of fresh mulch applied, giving us a bit of time away from our weed problems (at least in some spots). This mulching gives us a little more time to work on expanding the selection of native plants we have, keeping in mind plants that may be better suited for the small garden space we have.

Over the last few months we have removed some non-native shrub species and replaced them with native alternatives. We've also been adding a variety of lower-growing, less aggressive native perennials across the space. Other wonderful plants already present in the garden have been divided and added to new areas to keep visual continuity across the space.

Our wonderful volunteers have been busy helping with this whole process, weeding and removing plants, placing cardboard and mulch and helping add new elements. Please stop in to check out some of the new additions to our Garden.

Some new plants include: wild blue phlox, spreading jacob's ladder, foamflower, royal fern, prairie alumroot, nodding onion, thimbleweed, cream gentian, closed bottle gentian, dwarf bush honeysuckle, new jersey tea, bush cinquefoil, kalm's st john's wort, alternate-leaf dogwood, and aromatic sumac.

- Max Kornetzke, Butterfly Garden Coordinator

UPCOMING EVENTS

Unless otherwise stated, registration is required for all programs. Please note registration deadlines and program location. To register, email Jess at jessicaj@woodlanddunes.org or call 920-793-4007.

FAMILY PROGRAMS

Little Wings Play Days

10:00-11:00 am
Thursday, June 11th: Mud
Thursday, July 9th: Colors of Nature
Thursday, August 13th: Butterflies
Free

Gather in the outdoor Little Wings Nature Play Area for these special play days. Families can play together, have fun, and maybe get a little messy too! Activities for ages 2-10, but open to all. Children must be accompanied by an adult. Free, no registration required. In the event of poor weather, an indoor activity will be available in the education room. Sponsored by the Packers Foundation.

Families on the Move

Free

Lace up your shoes and bring the whole family out for a guided hike on one of our trails. Enjoy trail activities and explore different areas of the preserve. Bring a backpack with a water bottle, hat, and bug spray. Please note the register by dates. Sponsored by the Packers Foundation.

Forest Hike

Wednesday, June 17th | 10:00 am. Trail TBD.
Register by Monday, June 15th.

Prairie Hike

Wednesday, August 5th 9:00 am. Trail TBD.
Register by Monday, August 3rd.

Summer Family Fun Night

Friday, July 17th | 6:00-8:00pm | Free

Enjoy an early evening family night out at the Dunes. Learn about the night sky with our special guests from Camp Tapawingo and their portable planetarium. The planetarium will run at 6:00pm, 6:30pm, 7:00pm and 7:30pm and registration is required. Visit hands-on stations and take a self-guided walk to learn about bats and more! The program will be indoors if there is inclement weather. Sponsored by the Packers Foundation.

PROGRAMS FOR EVERYONE

Summer Star Parties

Sat, June 13th | 10:00-11:00 pm
Sat, July 18th | 10:00-11:00 pm
Sat, August 8th | 9:30-10:30 pm
Free

View night sky constellations with astronomers Al and Ben, along with the moon and other celestial objects through the big telescope in the Sky Shed. You can even bring your own telescope if you need help figuring out how to set it up. (Weather and sky conditions permitting.) Programs take place outside in the Sky Shed by the Nature Center. Please register before each session.

ADULT PROGRAMS

Adult Learning Series

All programs in this series have a sliding scale fee of $3-$10 per person. This will be collected at check-in, cash is preferred. Supported by Dufek Foundation

Wolves in Wisconsin: Perceptions, Perspectives and Ecology

Wednesday, June 3rd | 6:00-7:00 pm

Join David Slezewski for this interactive presentation about the wolves in Wisconsin and a year in the life of a pack. David will also address misconceptions, human perceptions, and explain how wolves are part of Wisconsin's ecosystem. David is a volunteer carnivore tracker for the Wisconsin DNR focusing on wolves. He completed training with the Timber Wolf Alliance and regularly attends wolf education talks and webinars.

Bumble Bee Biology, Identification, and Guided Walk

July 15th | 10:00-11:30 am

Want to learn more about the wonderful world of pollinators? Join Bumble Bee Brigade Coordinator Elizabeth Braatz on a guided walk to look at the world through a bug's eye through a guided pollinator walk and lecture! We'll first cover native bee biology, the bumble bee life cycle, and how you can help pollinators in your own homes. Next, we'll go over some bumble bee identification in the classroom. Did you know that Wisconsin is home to the federally endangered rusty patched bumble bee? You'll learn how to identify the rusty patched and other top Wisconsin species, and how you can share those findings through the community science / citizen science program Bumble Bee Brigade. Finally, we'll end with a guided walk to look for pollinators and any other interesting bugs that turn up that day. Space is limited, registration by Friday, July 10th.

ADULT SUMMER CAMP SERIES

Sliding scale fee of $5 - $25 per person
Camps are for ages 18+

Why should kids have all the fun? Join us and explore various nature topics through guided activities, crafts, exploration, and games in our Adult Summer Camp Series. Learn, laugh, and meet like-minded individuals that are excited to spend time outdoors. Adult Summer Camps will take place mostly outdoors. Registration is required, space is limited. To register call 920-793-4007 or email kennedyz@woodlanddunes.org

Nature at Night

Thursday, June 25th | 6:00-8:00 pm

Discover the fascinating world of nocturnal creatures through hands-on activities, games, and wildlife surveys. Learn more about the species that thrive in the night and what adaptations they have to do so! End the program with a night hike with staff to look and listen for some of those animals. Registration is required by Friday, June 19th.

Nature Art Journaling

Saturday, July 18th | 9:30-11:30 am

For art and nature lovers… no art skills needed, just a need for fun! Design your own nature art journal and fill the pages with beautiful one-of-a-kind creations. Create your own paint brushes, paint, and more! Registration required by Monday, July 13th.

Animal Disguises & Surprises

Wednesday, August 12th | 1:00-3:00 pm

Not all animals are as they seem! Learn about mimicry and camouflage through hands-on activities, experiments, and go for a hike to discover where these imposters are hiding! Registration required by Friday, August 7th.

GUIDED WALKS

Members: Free | Non-members: Sliding scale $3-$10/person

Join a staff member on a guided hike along one of our trails. Some hikes will have a specific topic while others will be about whatever nature presents to us that day. Registration is required the Monday before the hike takes place, as space is limited and meeting locations vary. Hikes will be under a mile long unless specified.

Bugler Preserve Hike

Friday, June 5th | 3:00 pm

Join staff for a guided hike around our Bugler Preserve. Learn about the Preserve's history, current projects, and what species live there.

Forget Me Not Creek Hike

Wednesday, June 24th | 7:00 am
Wednesday, July 22nd | 6 pm

Take a tour of our creek restoration project with Director Sue Crowley and Fisheries Biologist Titus Seilheimer

Marsh Meander

Friday, July 10th | 8:30 am

Meander through our marsh as we talk about what plants and animals live there. This hike will take place on the newly completed and accessible Cattail Trail boardwalk.

Summer Stroll

Thursday, July 30th | 9:00 am
Enjoy a guided stroll on one of our trails. Trail TBD.

Pollinator Prowl

Saturday, August 15th | 1:00 pm

Stroll through a flower-filled prairie while we search for the pollinators that help them bloom. Trail TBD

Thank You!

*Donations are recognized on **a quarterly basis**. If you don't see your donation on here, it missed the cutoff and will be in the next issue. Thank you.*

4th Annual heiknbrew

September 11th 5:00 p.m. to 9:00 p.m

As summer settles into the lakeshore and the trails come alive with evening sounds, Woodland Dunes Nature Center is excited to announce one of its most anticipated annual traditions: heiknbrew 2026! Taking place on September 11th from 5:00 p.m. to 9:00 p.m., this beloved fundraiser blends craft beverages, live music, local food, and nature into an unforgettable community experience, all while supporting the important conservation and educational mission of Woodland Dunes

Guests attending this year's event can expect an evening designed to celebrate our area's outdoor culture and community spirit. Beverage service will be available from 5:00- 8:00 p.m., with vendors set at different locations along our trails. Live music and food service will continue through 9:00 p.m., giving attendees plenty of time to explore the trails, enjoy conversation around the campfire with friends, and take in the atmosphere of the preserve during one of the most beautiful times of the year.

As always food is included with admission and one of the biggest additions to heiknbrew 2026 is the arrival of Kitzgarbo, a family-run, local, mobile café known for serving restaurant-quality roadside cuisine. Their philosophy centers around fresh ingredients, creativity and sustainability, values that align naturally with the mission of Woodland Dunes, promising bold flavors and memorable dishes throughout the evening.

A wide variety of beer, wine, and beverage vendors will be present this year will be more inclusive, providing non-alcoholic offerings from The Violet Inn in Two Rivers, giving everyone a chance to enjoy the evening.

We are excited to announce that music will be provided by Nettle Hill, a locally based, Americana-style trio known for rich harmonies, heartfelt songwriting, and a warm acoustic sound perfectly suited for an evening outdoors. Their blend of folk, roots, and Americana music will create the perfect soundtrack as guests wander the trails or relax beneath the trees with a beverage in hand.

heiknbrew 2026 will also welcome Briess Malting, one of Wisconsin's most respected names in craft brewing ingredients. Their participation adds another exciting layer to the event for beer enthusiasts interested in learning more about the craft brewing process and the agricultural roots behind many of the beverages being sampled throughout the night.

All trails will remain open during the event, encouraging guests to experience the preserve in a unique evening setting. Along the trails, attendees can participate in environmental education trivia, adding a fun and interactive learning component to the night.

Bucket raffles will also return this year, giving attendees the chance to win a variety of prizes while further supporting the programs, conservation efforts, and educational outreach initiatives of Woodland Dunes.

More than just a fundraiser, heiknbrew has become a celebration of community, nature, and the shared belief that preserving wild spaces matters. Whether attending for the music, the craft beverages, the food, or simply the chance to spend an evening outdoors with friends, guests will be helping ensure that Woodland Dunes continues to inspire future generations through conservation, education, and exploration.

Volunteers are always needed for this event, if you have interest in volunteering please contact:
Jason Prigge, Development Director

84th Bird Breakfast Bounty

Photo by Tracy Folz

84th Bird Breakfast & Migration Celebration

It was a fabulous day for the 84th annual Bird Breakfast and Migration Celebration! The weather was mild, the pancakes were fluffy, and the birds were abundant. Around 60 bird species were observed on the four guided bird walks or in the preserve during the event. Highlights include a pair of red-headed woodpeckers, a savannah sparrow at the bird feeder, multiple species of warblers, bobolinks, and meadowlarks. See the full list below. Thank you to all who joined us to celebrate the return of our migratory birds, our friends at Barnwood Coffee Company, and to the volunteers.

We wish to celebrate in particular Board Member and Kitchen Sponsor Dolly McNulty for her many years of service of organizing the kitchen crew. Dolly is turning in her apron this year and handing the reins over to our Development Director Jason Prigge. We look forward to serving you breakfast for the 85th Bird Breakfast Migration celebration next year.

Dolly McNulty

BIRD LIST FROM MAY 16 (How many can you check off?)

- American crow
- American goldfinch
- American redstart
- American robin
- Bald eagle
- Barn swallow
- Black-capped chickadee
- Blue jay
- Blue-gray gnatcatcher
- Blue-headed vireo
- Bobolink
- Brown-headed cowbird
- Canada goose
- Common grackle
- Common yellowthroat
- Double-crested cormorant
- Eastern meadowlark
- European starling
- Gray catbird
- Great crested flycatcher
- House finch
- Indigo bunting
- Least flycatcher
- Mallard
- Mourning dove
- Northern cardinal
- Northern parula
- Northern rough-winged swallow
- Northern waterthrush
- Osprey
- Ovenbird
- Pelican
- Red-winged blackbird
- Rock pigeon
- Ruby-throated hummingbird
- Clay-colored sparrow
- Savanah sparrow
- Song sparrow
- Swamp sparrow
- White-crowned sparrow
- Swainson's thrush
- Turkey vulture
- Red-eyed vireo
- Black-and-white warbler
- Blue-winged warbler
- Chestnut-sided warbler
- Magnolia warbler
- Nashville warbler
- Palm warbler
- Tennessee warbler
- Wilson's warbler
- Wild turkey
- Downy woodpecker
- Red-bellied woodpecker
- Red-headed woodpecker
- Northern house wren
- Sedge wren

Osprey

Check out our new website!

Woodland Dunes is always growing and evolving. We are excited to announce that our newly launched website offers a more beautiful, accessible, and user-friendly experience. Making it easier than ever to explore trails, discover programs, support conservation efforts, and connect with nature in the heart of our 1,500-acre preserve. Special thanks to volunteer Tina Prigge for her work in designing and launching the new website.
